Horizontal Wrapping

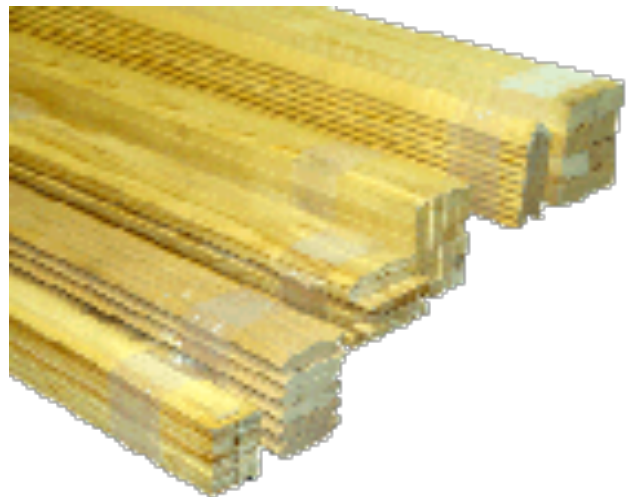

Key Benefits

- Positive heat seal - eliminates loose tails and bundle failure
- Heavy duty construction - designed for industrial applications
- Low Maintenance - hardlube coated wear parts for years of reliable service
- Economical - uses low cost stretch film
- Product Friendly - allows tight banding without product damage

While the force to load adjustable film tensioning feature allows you to control your wrapping tension, the inherent properties of stretch film will never damage your product.

Flow through design makes the Flex Strap stretch film banding machines the ideal solution for bundling long length products, such as, millwork & extrusions. The Flex Strap's unique *heat seal* assures bundles stay bundled by preventing the film from unravelling.

Sal-Tech Easy Packaging

Horizontal Wrapping Machines

Horizontal Wrapping Machines – STEP H-Wrap Series

Horizontal wrapper is specially designed for long products such as, plastic material, pipes, timber etc. Its principle is rotating the ring holding the film around the product, as it is conveyed forward. These types of wrapping machines are used to wrap a package horizontally to further stabilize where conventional vertical wrapping machines cannot. The STEP H-Wrap Series of machines are engineered to wrap small to medium sized packages and products.

STEP H-wrap 400

Features:

- | | |
|-----------------------------|----------------------------------|
| • Packing Material: | Stretch Film or Anti-rust Paper |
| • Material Width: | 125mm-200mm |
| • Product dimension max: | 200x200mm |
| • Rotating Inner Diameter: | 400mm |
| • Conveyor Speed: | 5-8m/min |
| • Machine Weight: | 600KG |
| • Power Supply: | 2kw/AC380V/50HZ |
| • Machinery Shape Size: | (2100 X 1000 X 1400)mm |
| • Infeed and outfeed belts: | As per demand to order as option |
| • Item no.: | 43801400 |

STEP H-wrap 1800

Features:

- Rotating ring inner diameter 1800 mm
- Package dimension 100 mm*1200 mm(W*H)
- Packing length >1200 mm
- Rotating ring speed 20-30 rpm
- Conveying speed 5-8 m/min
- Power 2.2 Kw
- Machine Weight 1500 kg
- Machine shape size 2600 mm * 1650 mm * 2600 mm
- Packing material width 200 mm- 500 mm
- Item no.: 43801800

[E100 Horizontal stretch wrapping machine](#)

The horizontal stretch wrapping machine dopacking for small size packages by stretch film,woven,paper with PLC program control which makes orbital wrapper vary easy to do operation and maintain...

[E200 Horizontal stretch wrapping machine](#)

horizontal stretch wrapping machine packing solution is a good machine. No matter short or big package, the machine wroks properly for it. It proper packing for small load with ring OD:350mm also wrapping for bundle OD<100mm...

[E300 Horizontal stretch wrapping machine](#)

The horizontal spiral stretch wrapper designs for pipe packing, tube wrapping, profile covering. The wrapper E300 good for object OD500mm. In wrapper the wrapper is appropriate packing for all size rectangular balers, bar, steel sheet plate, PDF profile, pipe bundle, tray... ..

[E400 Horizontal stretch wrapping machine](#)

Horizontal ring stretch wrapping orbital wrapper equipts with the strong structure for high speed wrapping. By stretch film wrapping, the package well packing and covering collections. It is can easily many types bale styles packages....

[E500 horizontal wrapping machine&stretch wrapper](#)

This is automatic wrapping machine. Also named orbital stretch wrapper that is able to wrap the load from in-feed conveyor and automatic operation for different products from production line.

[E600 Horizontal stretch wrapping machine](#)

Spiral wrapping orbital wrapper professional manufacturer in China. The different package loads packed by conveying the load from the wrapping station. The packing material is stretch film. We are providing local engineer service for installation and training....

[E1000 Horizontal stretch wrapping machine](#)

The machine working for load OD by customize solution which makes orbital stretch wrappers packing for wrap load Package OD....

[E1400 Horizontal stretch wrapping machine](#)

There are many types stretch wrapper that capable in high speed stretch automatic vary products.

[E1800 Horizontal orbital stretch wrapper](#)

Automatic stretch wrapper by different devices such as cutter, pressing device... That are special for packing your package with consistence tension control ...

E2400 Horizontal stretch wrapping machine

The big steel tube, aluminum profile, pallet... can be packed by wrapping machine with Fork man loading position.

Horizontal Orbital Stretch Wrapper

This is solution for packing small as well as bigger boards to reduce labor .

Horizontal Stretch Wrapping Machine

Panel orbital stretch machine for boards, wooden packaging, which helping to reduce labor charges in panel wooden packing machine

Horizontal Ring Stretch wrapper

Rod wrapping machine with strong structure designed

Spiral Orbital Wrapper

spiral wrapper is for straight such as Aluminum section...The supplier is able to meet your requimrent...

Profile Horizontal Orbital Wrapping Machine

The horizontal spiral wrapper solution designed for profile packaging.....

[Aluminum Horizontal Orbital Wrapping Machine](#)

Aluminum packaging machine for aluminum stretch wrapping by stretch film section packaging. This is an efficiency wrapping machine with speed of up to 1–21M per minute.....

[Rod Horizontal Orbital Wrapping Machine](#)

Rod wrapping machine is works for stainless steel and aluminum tube per size : 200–1800mm. covering packaging requirement.....

Orbital Wrapping Machine with film sealing equipment

The orbital wrapping machine is designed for sealing + orbital stretch wrapping for 6 sides covering and stretch wrapping...Loading the package on the infeding coveyor...

Pipe Horizontal Orbital Wrapping Machine

FHOPE-E Series horizontal orbital wrapping machine is a kind of stretch wrapper for pipe bundel,rod bundle,Aluminum section.There is able to providing wrapper.....

Semiauto horizontal orbital wrapping machine S200

The machine can be connect with the production line for automatic operation. lDouble-ring double-rub wheel devices make working more safe stable energetic. lPLC HMI are adopted. lPhotocell sensor is adopted for setting packing positionautomatically. lIndicator alarms automatically when trouble occurs. Trouble can be shown automa...
